## The ONLY Ligature Resistant Surface Mounted Solution for CMS, ADA and NFPA-101 Life Safety Code Compliance

**The Problem:** The Department of Health & Human Services (DHHS) Centers for Medicare & Medicaid Services (CMS) has required in CFR 482.13 that psychiatric and behavioral health facilities maintain ligature “resistant” or ligature “free” environments. Many existing fire extinguisher or extinguisher cabinet installations present a ligature risk and an immediate jeopardy situation.

**The Solution:** Ligature resistant fire extinguisher installations are easy with the low-profile, ligature resistant, surface mounted cabinet designed for Oval Brand extinguishers.

Oval Brand Fire Products now offers the ONLY surface mounted solution that complies with CMS, ADA and NFPA-101 Life Safety Code.

The low-profile ligature resistant cabinet, designed for Oval Brand extinguishers, has safe sloping edges and protrudes 4” from the surface.

With Oval, there is no need to cut holes into existing walls for compliant cabinets.

Ligature risk deficiencies do not qualify for Life Safety Code (LSC) waivers, and therefore, an LSC waiver may not be granted.

For more information and a free demonstration, contact your local fire equipment distributor, industrial supply distributor or visit [ovalfireproducts.com](http://ovalfireproducts.com).
